

CLOTHES FOR INDEPENDENT LIVING

Clothing Comfort

WHEN USING CRUTCHES

Underarm Gusset

A piece of fabric set in at the underarm (a gusset) gives extra room so that clothes don't bind, tear or hike up at the sides when using crutches. Use matching or near matching fabric. A fabric piece can be cut from the tails of "tuck-in" shirts.

- 1 Cut a diamond-shaped piece of soft knit or woven fabric which is about 4" x 6", depending on the size of the garment.

- 4 With right sides of the fabrics together, pin and sew the diamond-shaped piece into the underarm area of the garment.

- 2 Open up underarm and sleeve seams for $2\frac{1}{4}$ inches to $2\frac{1}{2}$ inches.
- 3 Turn back the corners of underarm opening.

MICHIGAN STATE UNIVERSITY

Underarm Protection

To prevent skin irritation from the rubbing of crutches, line inside the underarm with a soft, absorbent fabric shield. Use a velour, soft stretch terrycloth or several layers of cotton flannel.

- 1 Cut out a round or oval-shaped piece of the shield fabric. Cut on the bias if it's a woven fabric.
- 2 Finish off the edge(s) of the oval fabric piece.

- 3 Set it into the underarm area of the garment.
- 4 Attach it to the armhole and underarm seams with firm but flexible stitches that "give" when strain is placed on the garment.

BERNETTA KAHABKA, Specialist, Cooperative Extension Service
Department of Human Environment and Design, Michigan State University

Cooperative Extension Service Programs are open to all without regard to race, color, or national origin. Issued in furtherance of cooperative extension work in agriculture and home economics, acts of May 8, and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Gordon E. Guyer, Director, Cooperative Extension Service, Michigan State University, East Lansing, Michigan 48824. Price 15 cents. 1P-SM-3:78-UP
