

HEIGHT INCREASE FOR RECLINER CHAIRS

Chairs are much easier to get in and out of the higher they are. If the upper part of the legs are lower than the knees, it is difficult to rise. By adding extended legs to the chairs, it naturally puts the upper portion of the leg on a position that they become angled upward and then they are above the knees.

TURN CHAIR OVER...SCREW ON NEW LEGS-
SIT CHAIR BACK UP - YOU HAVE JUST RAISED
A CHAIR THE EASY WAY.....
